About This Game

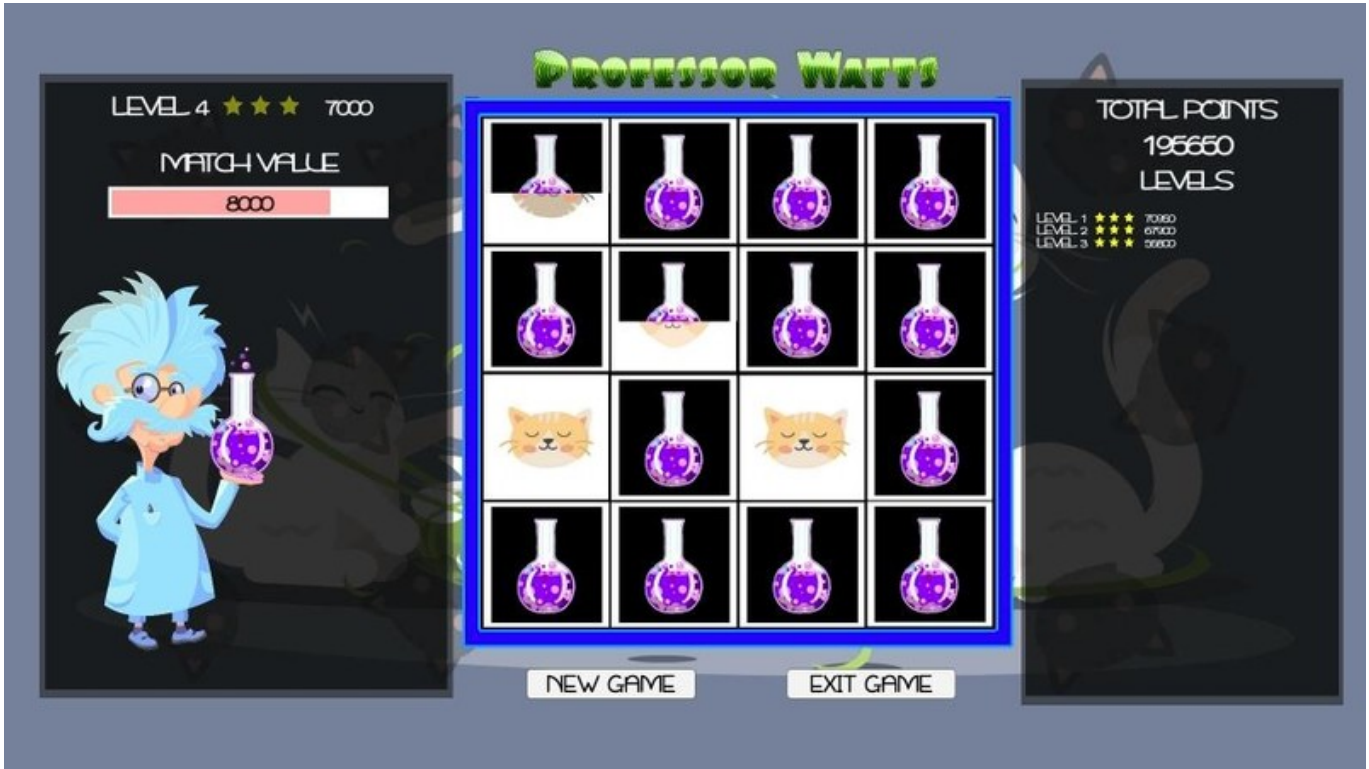

Hello Professor Watts here and I have some research to do on memory skills. I have assembled a wide variety of cats to put our memory to the test. We can see how we're doing by completing matches in a specific amount of time and earning points to track our overall progress. It would really help having someone sharp like yourself on my team to complete this research. Complete 80 challenging randomized memory match puzzles and aim for a new top score each time you play.

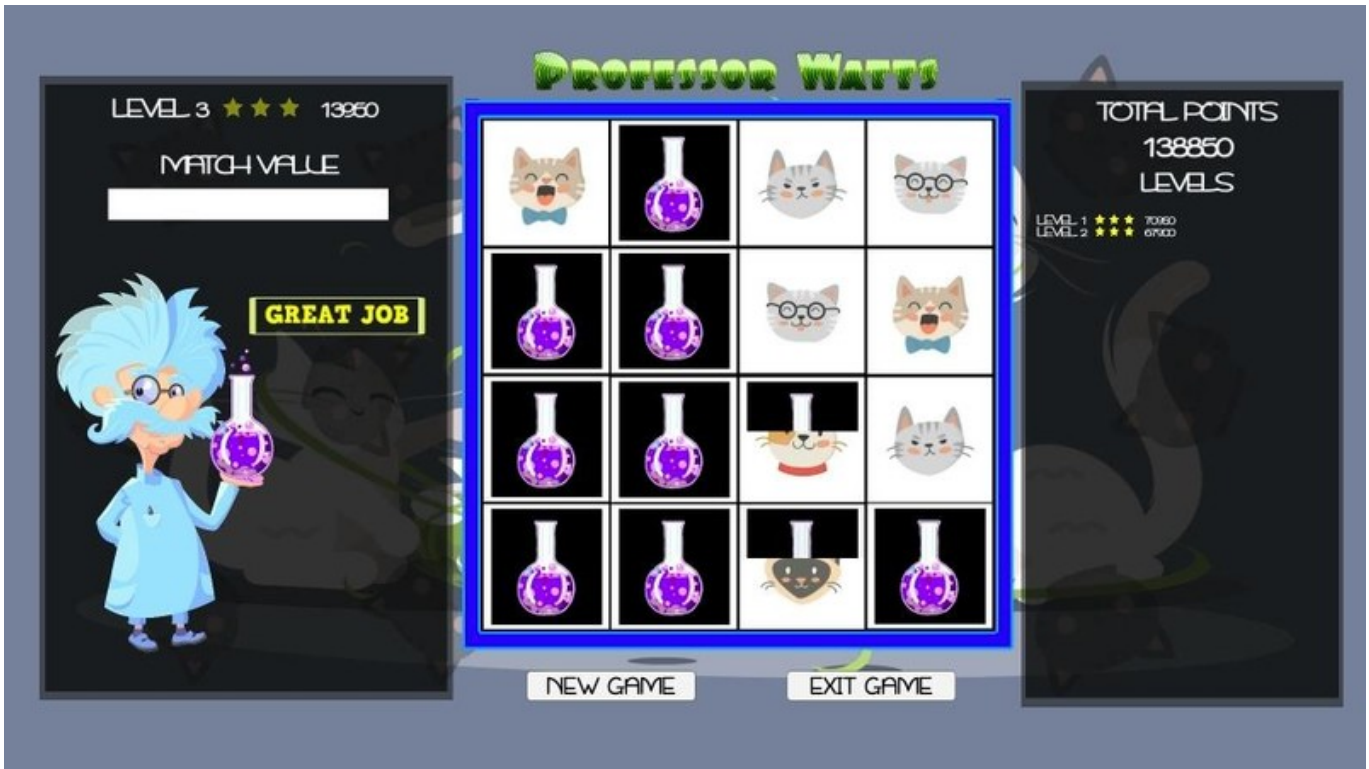

Title: Professor Watts Memory Match: Cats
Genre: Casual, Indie, Strategy
Developer:
Ripknot Systems
Publisher:
Ripknot Systems
Franchise:
Professor Watts
Release Date: 18 Sep, 2018

a09c17d780

English

The idea of the game is simple, it's just a memory test game that you need to match up two of the same cat pictures together and move on to the next puzzle until you beat them all. Sadly I can not recommend this game as it's completely broken, all you have to do is keep clicking on the same picture over and over and you still get points and win the puzzle so you have no need to actually play the game and the game crashes occasionally when you are on another window.
